# Preface

## Document Purpose and Audience

This document provides an overview of the *Reports* feature in HP Insight Online. This document is intended for users of Insight Online who are using the *Reports* feature to generate reports and describes tasks such as generating, accessing, and viewing reports.

## Product Overview

HP Insight Online provides one-stop, secure access to the information you need to monitor the devices in your IT environment from anywhere, anytime.

HP Insight Online is a key component of the Proactive Insight experience. Through the HP Support Center portal, Insight Online automatically displays devices remotely monitored by HP Insight Remote Support software and easily tracks service events and support cases, displays device configurations, monitors your HP contracts and warranties, and generates reports.

Sign-in with HP Passport to use Insight Online. You can efficiently monitor, track and service your HP devices using Insight Online. With authorization from their customers, HP Authorized Channel Partners can remotely review their customers' IT environment to provide support and consultation. For more information about HP Insight Online and HP Insight Remote Support, go to:

<http://www.hp.com/go/insightonline/info>.

<http://www.hp.com/go/insightremotesupport>.

## Related Documents

For additional Insight Online and Insight Remote Support documentation, go to:

<http://www.hp.com/go/insightremotesupport/docs>.

## HP Support Information

HP recommends you consult the Insight Online and Insight Remote Support documentation to resolve issues. If you need further support for Insight Online, help is available through HP Support Center Usage Support. For more information, go to: <http://www.hp.com/go/contactHPSC>.

## We Appreciate Your Feedback!

If you have comments about this document, you can [contact the documentation team](#) by email. If an email client is configured on this system, click the link above and an email window opens with the following information in the subject line:

### **Feedback on Insight Online, Reporting Guide**

Just add your feedback to the email and click send.

If no email client is available, copy the information above to a new message in a web mail client, and send your feedback to [techdocs\\_feedback@hp.com](mailto:techdocs_feedback@hp.com).

# Chapter 1: About HP Insight Online My Reports

The *Reports* feature provides online reporting for your devices and allows you to manage your reports efficiently. You can access report templates, save reports for reuse, view a log of prior results, and print reports. Use this guide as an introduction to the available reports and as a reference for your reporting needs.

For information about using Insight Online, refer to the HP Insight Online User's Guide:

[http://www.hp.com/support/InsightOnline\\_GSG\\_en](http://www.hp.com/support/InsightOnline_GSG_en)

## Access Reports

Access *Reports* through the HP Support Center using your HP Passport user ID and password.

**Note:** To register for an HP Passport account, point your browser to <http://www.hp.com/go/hpsc> and click the **New User Registration** link.

Sign in to HP Insight Online as one of the following user types:

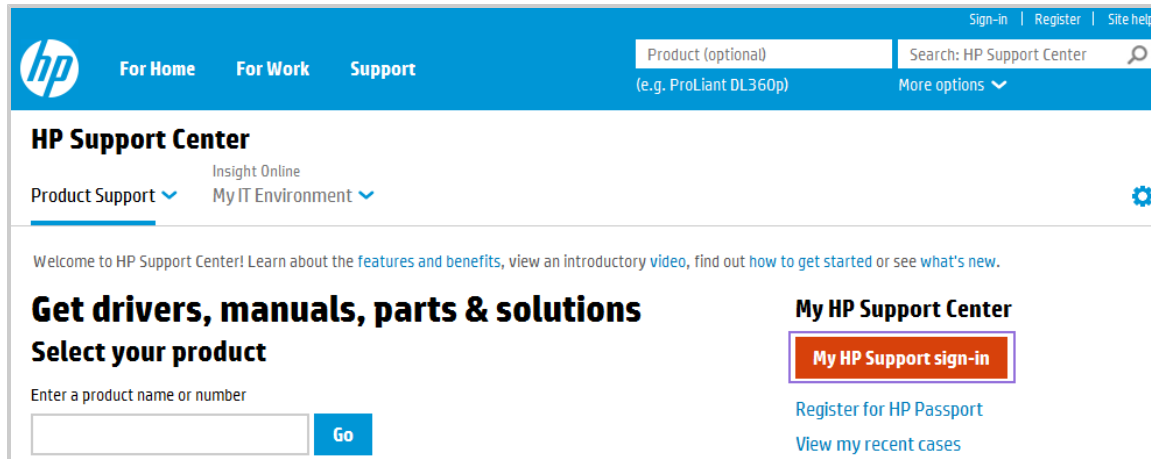

**Table 1.1 HP Insight Online User Types**

| User Type                               | Access                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   |
|-----------------------------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>An Authenticated User</b>            | As an authenticated user you have access to the Insight Online My IT Environment tab. Use the Insight Online My IT Environment tab to manage your reports. For more information about accessing <i>Reports</i> , see " <a href="#">Accessing Reports as an Authenticated User</a> " on the next page.                                                                                                                                                                                                                                    |
| <b>An HP Authorized Channel Partner</b> | <p>As an HP Authorized Channel Partner you have access to the Insight Online My IT Environment tab and the Insight Online My Customers tab. Use the Insight Online My IT Environment tab to manage your reports.</p> <p>With authorization from your customers, use the Insight Online My Customers tab to generate, view, and manage your customer reports. For more information about the accessing reports as a channel partner, see "<a href="#">Accessing Customer Reports as an HP Authorized Channel Partner</a>" on page 10.</p> |

## Accessing Reports as an Authenticated User

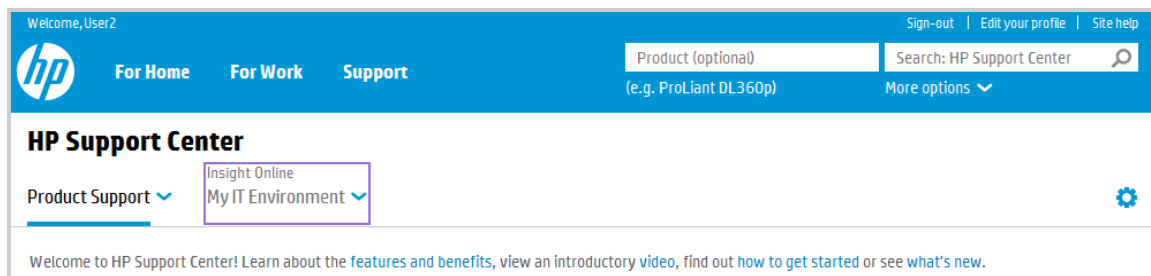

To access *Reports*, complete the following steps:

1. To access the HP Support Center, point your browser to: <http://www.hp.com/go/hpsc>. The *HP Support Center* screen appears.

2. On the *HP Support Center* screen, click **My HP Support sign-in**. The *HP Passport Sign-in* screen appears.

3. On the *HP Passport Sign-in* screen, enter your HP Passport user ID and password and click **Sign in**. The *HP Support Center* screen appears.

4. On the *HP Support Center* screen, click the **Insight Online My IT Environment** tab.

The *HP Insight Online* screen appears. The Reports icon is on the right side of the screen.

The screenshot shows the HP Support Center dashboard. At the top, there's a navigation bar with 'Sign-out', 'Edit your profile', and 'Site help'. Below this, the 'HP Support Center' header is visible. The main navigation bar includes 'Product Support', 'My Support', and 'Insight Online My IT Environment'. The 'Insight Online My IT Environment' section is active, showing a 'Dashboard' dropdown and icons for 'DEVICES', 'REPORTS' (highlighted), and 'SETTINGS'. Below the navigation bar, a welcome message is displayed. The dashboard is divided into three main sections: 'Devices', 'Service events', and 'Contracts and warranties'. The 'Devices' section shows 3 devices, 32 total devices, 2 critical devices, 24 normal devices, and 6 non-remote support devices. The 'Service events' section shows 7 total service events, 7 critical service events, 2210 total cases, 2206 new cases, and 4 in progress cases. The 'Contracts and warranties' section shows 174 total contracts and warranties, 8 expired, 1 expiring within 30 days, and 67 expiring within 31 days to 1 year.

- Click **Reports**. The *Generated Reports* tab appears by default.

The screenshot shows the 'Generated Reports' tab in the HP Insight Online interface. The 'Select' dropdown is set to 'All generated reports'. A table lists the generated reports with columns for 'Report name', 'Status', 'Submitted', and 'Remove'. The table contains five rows of reports, all submitted on 05 November 2012. The 'My Service Event Report' is marked as 'Failed', while the others are 'Completed'.

| Report name                    | Status    | Submitted                     | Remove                   |
|--------------------------------|-----------|-------------------------------|--------------------------|
| My Device Configuration Report | Completed | 05 November 2012 11:19:37 GMT | <input type="checkbox"/> |
| My Contract Report             | Completed | 05 November 2012 10:24:36 GMT | <input type="checkbox"/> |
| My Care Pack Report            | Completed | 05 November 2012 09:38:50 GMT | <input type="checkbox"/> |
| My Support Case Report         | Completed | 05 November 2012 09:36:27 GMT | <input type="checkbox"/> |
| My Service Event Report        | Failed    | 05 November 2012 09:33:43 GMT | <input type="checkbox"/> |

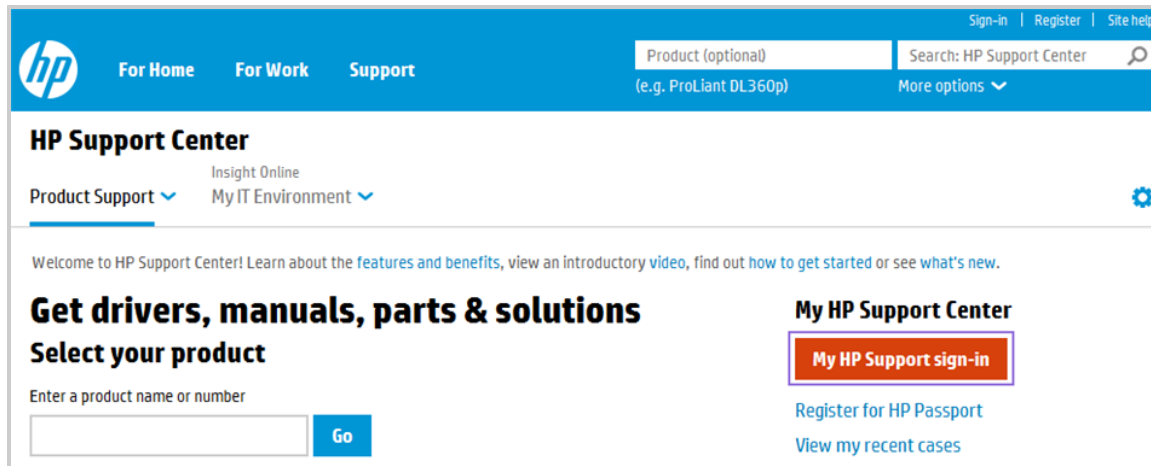

A 'REMOVE ALL CHECKED' button is located at the bottom right of the table.

The *Generated Reports* tab displays a list of generated reports in the *All generated reports* section. For more information about generating reports, see ["Generating Reports on the My IT Environment Tab"](#) on page 17.

## Accessing Customer Reports as an HP Authorized Channel Partner

To access *Reports* as an HP Authorized Channel Partner, complete the following steps:

1. To access the HP Support Center, point your browser to: <http://www.hp.com/go/hpsc>. The *HP Support Center* screen appears.

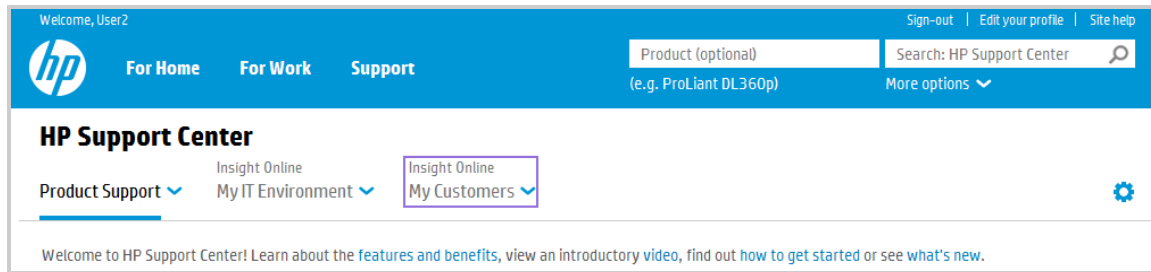

The screenshot shows the HP Support Center homepage. At the top is a blue navigation bar with the HP logo, links for 'For Home', 'For Work', and 'Support', a search bar with 'Product (optional)' and 'Search: HP Support Center', and links for 'Sign-in', 'Register', and 'Site help'. Below the navigation bar, the main heading is 'HP Support Center' with sub-links for 'Product Support' and 'My IT Environment'. A welcome message follows: 'Welcome to HP Support Center! Learn about the features and benefits, view an introductory video, find out how to get started or see what's new.' The main content area is divided into two sections. The left section is titled 'Get drivers, manuals, parts & solutions' and 'Select your product', featuring a text input field for 'Enter a product name or number' and a 'Go' button. The right section is titled 'My HP Support Center' and contains a red button labeled 'My HP Support sign-in', with links for 'Register for HP Passport' and 'View my recent cases'.

2. On the *HP Support Center* screen, click **My HP Support sign-in**. The *HP Passport Sign-in* screen appears.

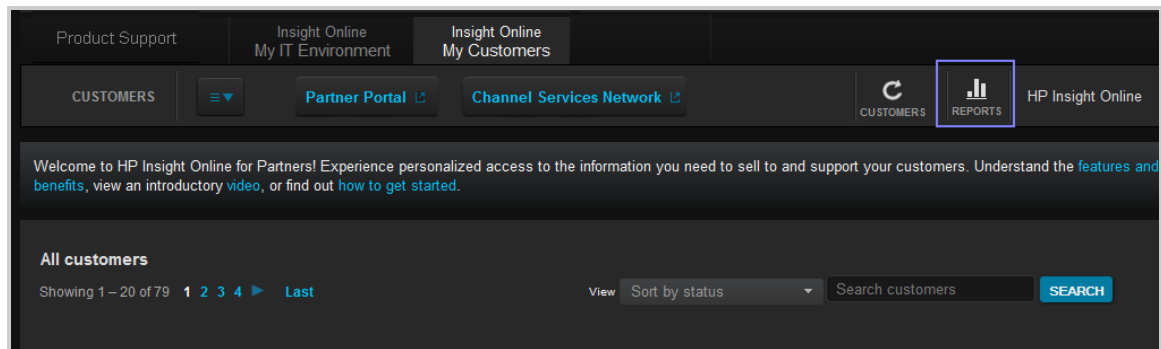

The screenshot shows the HP Passport Sign-in screen. It has a white background with a blue header that says 'Sign in'. Below the header, it says 'Sign in using HP Passport' with a question mark icon. A red asterisk indicates a required field. The 'User ID' field is a text input box with a red asterisk. Below it, a note says 'Your user ID may be your email. Forgot User ID'. The 'Password' field is a text input box with a red asterisk. Below it, a link says 'Forgot Password'. There is a checkbox for 'Remember me on this computer'. At the bottom, there are two buttons: 'Create an account' and 'Sign in'. A security notice at the bottom right says 'HP Passport is secure' with a lock icon and a question mark icon.

3. On the *HP Passport Sign-in* screen, enter your HP Passport user ID and password and click **Sign in**.

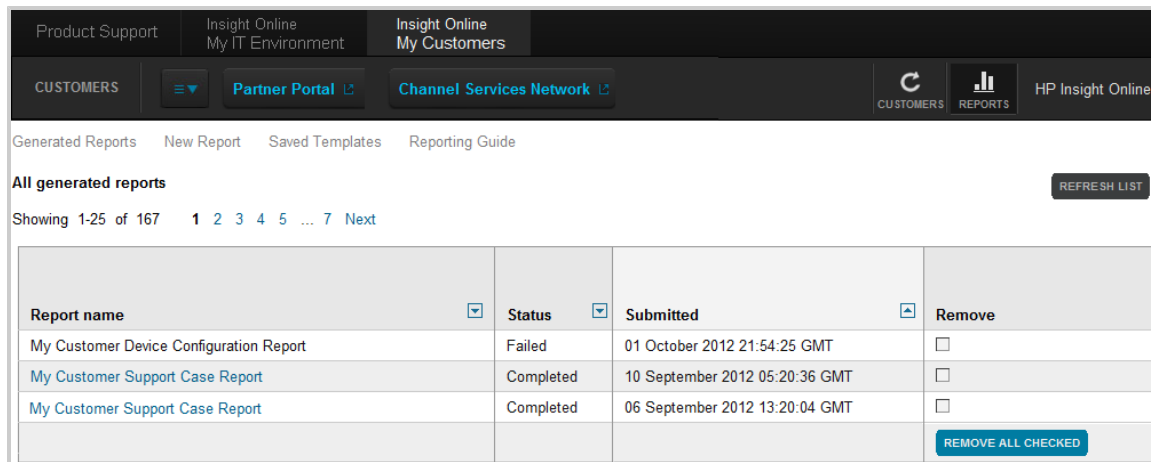

The **HP Support Center** screen appears.

4. Click **Insight Online My Customers**. The *Insight Online for Partners* screen appears.

5. To access your customer reports, click **Reports**. The *Generated Reports* tab appears by default.

The *Generated Reports* tab displays a list of generated reports in the *All generated reports* section. For more information about generating customer reports, see ["Generating Reports on the My Customers Tab"](#) on page 35.

## Chapter 2: Managing Reports

This chapter describes how to manage your reports and your customers' reports. From *Reports*, you can perform the following tasks:

| Tab                      | Description                                                                                                                                                                                          |
|--------------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>Generated Reports</b> | Click <b>Generated Reports</b> to display a list of generated reports and the status of the report. For more information about viewing reports, see <a href="#">"View Generated Reports" below</a> . |
| <b>New Report</b>        | Click <b>New Report</b> to display the report templates for creating a new report. For more information about creating new reports, see <a href="#">"Generate a New Report" on page 17</a> .         |
| <b>Saved Templates</b>   | Click <b>Saved Templates</b> to display a list of saved templates. For more information about saving templates, see <a href="#">"Generate Reports from Saved Report Templates" on page 15</a> .      |
| <b>Reporting Guide</b>   | Click <b>Reporting Guide</b> to display a link to the HP Insight Online Reporting User Guide (this guide).                                                                                           |

### View Generated Reports

The *Generated Reports* tab displays generated reports and their status. Reports are based on batched processing and generate once every 30 minutes. The following image displays the *Generated Reports* tab.

| Generated Reports   New Report   Saved Templates   Reporting Guide |             |                                  |                          |
|--------------------------------------------------------------------|-------------|----------------------------------|--------------------------|
| All generated reports                                              |             |                                  |                          |
| Showing 1-5 of 20   1   2   3   4   5   ...   20   Next            |             |                                  |                          |
| 6 REFRESH LIST                                                     |             |                                  |                          |
| Report name 1                                                      | Status 2    | Submitted 3                      | Remove 4                 |
| <a href="#">My Contracts and Warranties Report</a>                 | Completed   | December 4, 2012 7:30:39 AM GMT  | <input type="checkbox"/> |
| <a href="#">My Contract Report</a>                                 | In Progress | December 3, 2012 9:47:40 AM GMT  | <input type="checkbox"/> |
| <a href="#">My Care Pack Report</a>                                | Completed   | November 30, 2012 6:57:03 AM GMT | <input type="checkbox"/> |
| <a href="#">My Support Case Report</a>                             | Completed   | November 29, 2012 5:25:58 AM GMT | <input type="checkbox"/> |
| <a href="#">My Service Event Report</a>                            | Failed      | November 29, 2012 3:41:54 AM GMT | <input type="checkbox"/> |
| 5 REMOVE ALL CHECKED                                               |             |                                  |                          |

The *All generated reports* section contains the following columns:

| Column               | Description                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      |
|----------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>1 Report name</b> | The name of the report.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          |
| <b>2 Status</b>      | <p>The status of the report, for example, <i>In Progress</i>, <i>Completed</i>, <i>Failed</i>, and <i>Retry</i>.</p> <ul style="list-style-type: none"> <li>While the report is generating, the status of the report appears as <i>In Progress</i>.</li> <li>When the report generates, the status appears as <i>Completed</i> and the report name appears as a blue hyperlink. Click the hyperlink to open the report.</li> <li>If the status appears as <i>Failed</i>, then an error occurred while generating the report. If a report fails, then regenerate the report by accessing the report you saved from the <i>Saved Templates</i> tab and click <b>Generate</b>. For more information about known issues, see "<a href="#">Troubleshooting Reports</a>" on page 51.</li> <li>If the status appears as <i>Retry</i>, then the report did not generate. To generate the report, click the <b>Retry</b> link.</li> </ul> |
| <b>3 Submitted</b>   | The date and time you generate the report.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       |
| <b>4 Remove</b>      | Select the <b>Remove</b> check box and click <b>Remove All Checked</b> to remove the report from the list. The system permanently removes the report from the list.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              |

The *Generated Reports* tab contains the following buttons:

| Button                      | Description                                                                                                                                                     |
|-----------------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>5 Remove All Checked</b> | Click <b>Remove All Checked</b> to remove the reports that have the <b>Remove</b> check box selected. The system permanently removes the reports from the list. |
| <b>6 Refresh List</b>       | Click <b>Refresh List</b> to refresh the list of reports.                                                                                                       |

## Accessing Generated Reports

To access a generated report, complete the following steps:

1. Click **Generated Reports**.
2. In the *All generated reports* section, click a report name. The *File Download* message box appears.
3. Click **Open** to view the report. The report opens in the format you chose when you created the report (PDF, Microsoft Excel, or zipped Comma Separated Value format (CSV)).

**Note:** You can only view reports with a status of *Completed*.

You can also view generated reports from your email. When generating a report, enter your email address to receive a notification when the report completes, then click the link in the email notification to view the generated report. The report opens in the format you chose when you created the report (PDF, Microsoft Excel, or zipped CSV).

**Note:** Report data is not in real time and has a 24 hour lag in completeness. Report data may appear blank due to daily updates to the database.

## Sorting Generated Reports

You can sort the list of generated reports by report name, status, and the date you submit the report.

| To Sort...                                                      | Click...                                                                                                            |
|-----------------------------------------------------------------|---------------------------------------------------------------------------------------------------------------------|
| Report names in ascending order (a-z) or descending order (z-a) | The Report name column.                                                                                             |
| Reports by status                                               | The Status column.                                                                                                  |
| Reports from an earliest to a latest date                       | The Submitted column.                                                                                               |
| Generated reports by page number                                | A page number to navigate to a specific page or click <b>Previous</b> or <b>Next</b> to navigate through the pages. |

## Understanding your HP Proactive Care Reports

If you purchased the HP Proactive Care service, then you are entitled to three reports. These reports are generated for you on a regular basis and automatically appear on the *Generated Reports* tab. HP Proactive Care service contains the following reports:

| Report                                      | Description                                                                                                                                                                                                                                                                                                                                                                                     |
|---------------------------------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>Incident Report</b>                      | The Incident Report contains detailed information about all incidents, incident trends, and parts usage for devices covered by your HP Proactive Care contract to help avoid repeat problems. The report is generated on a quarterly basis and appears automatically in the generated reports list.                                                                                             |
| <b>Proactive Scan Report</b>                | The Proactive Scan Report contains information about HP Proactive Care supported devices connected to HP. The report provides a technical device assessment that is designed to help identify potential system configuration problems before they impact your business operations. The Proactive Scan Report is generated twice a year and appears automatically in the generated reports list. |
| <b>Firmware and Software Version Report</b> | The Firmware and Software Version Report contains recommendations for applicable software versions, patches, and firmware revisions for each covered device connected to HP. The report is generated twice a year and appears automatically in the generated reports list.                                                                                                                      |

You only receive reports for the Proactive Care Service Agreement IDs (SAIDs) that are linked to your HP Passport through HP Support Center.

For more information about the HP Proactive Care service, go to: [www.hp.com/services/proactivecarecentral](http://www.hp.com/services/proactivecarecentral)

# Generate Reports from Saved Report Templates

While generating a report, you can select to save the report template. For information about how to generate a report and save a report as a report template, see ["Generating Reports on the My IT Environment Tab" on page 17](#). View your saved templates on the *Saved Templates* tab.

| Generated Reports                | New Report             | <b>Saved Templates</b>           | Reporting Guide          |
|----------------------------------|------------------------|----------------------------------|--------------------------|
| Saved templates home             |                        |                                  |                          |
| Showing 1-25 of 70    1 2 3 Next |                        |                                  |                          |
| Template Name 1                  | Report Type 2          | Submitted Date 3                 | Remove 4                 |
| rep_template                     | My Support Case Report | March 6, 2012 12:05:36 PM GMT    | <input type="checkbox"/> |
| davidstest1                      | My Contract Report     | October 25, 2012 10:38:29 PM GMT | <input type="checkbox"/> |

**Note:** When you click **Saved Templates** a message appears if you do not have any saved templates.

The *Saved templates home* section contains the following columns:

| Column                  | Description                                                                                                                                                                                             |
|-------------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>1 Template Name</b>  | The name of the template.                                                                                                                                                                               |
| <b>2 Report Type</b>    | The report type. For more information about report types, see <a href="#">"Generating Reports on the My IT Environment Tab" on page 17</a> and <a href="#">"Generate Customer Reports" on page 35</a> . |
| <b>3 Submitted Date</b> | The date and time you submit the report.                                                                                                                                                                |
| <b>4 Remove</b>         | Select the <b>Remove</b> check box and click <b>Remove All Checked</b> to remove the report from the list. The system permanently removes the report.                                                   |

To generate a report template from a saved report template, complete the following steps:

1. Click **Saved Templates**. The *Saved Templates* tab appears.

| Generated Reports      | New Report             | <b>Saved Templates</b>     | Reporting Guide           |
|------------------------|------------------------|----------------------------|---------------------------|
| Saved templates home   |                        |                            |                           |
| Showing 1-3 of 3       |                        |                            |                           |
| Template Name          | Report Type            | Submitted Date             | Remove                    |
| Single_SC_             | My Support Case Report | 04 March 2012 02:09:32 GMT | <input type="checkbox"/>  |
| 53_32266               | My Support Case Report | 04 March 2012 03:19:34 GMT | <input type="checkbox"/>  |
| My Support Case Report | My Support Case Report | 06 March 2012 05:07:06 GMT | <input type="checkbox"/>  |
|                        |                        |                            | <b>REMOVE ALL CHECKED</b> |

2. In the *Template Name* column, click the template name you want to reuse.
3. Modify the report parameters.
4. Click **Generate Report**.

View the generated report in the *All generated reports* section on the *Generated Reports* tab.

## Performing Tasks with Saved Report Templates

Use your saved report template to perform the following tasks:

| Task                                             | Description                                                                                                                                                        |
|--------------------------------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>Regenerate a report when it fails</b>         | Access the report on the <i>Saved Templates</i> tab and click <b>Generate</b> to regenerate the report.                                                            |
| <b>Reuse the report template for new reports</b> | Access the report on the <i>Saved Templates</i> tab and edit the report name. Use the previous report parameters in the saved template and click <b>Generate</b> . |
| <b>Modify report parameters</b>                  | Access the report on the <i>Saved Templates</i> tab and update the report parameters, then click <b>Generate</b> .                                                 |
| <b>Regenerate saved report template</b>          | Access the report on the <i>Saved Templates</i> tab and click <b>Generate</b> to regenerate the report.                                                            |

## Remove Reports

To remove a generated report, complete the following steps:

1. Click **Generated Reports**.
2. In the *All generated reports* section, locate the report you want to remove.
3. In the *Remove* column, select the check box for the report.
4. Click **Remove All Checked**.

The report is permanently removed from the *All generated reports* section.

## Print Reports

Select to view a report in PDF, Microsoft Excel, and CSV formats. Use PDF for printing because it is a printer-friendly format.

To print a report, complete the following steps:

1. Click **Generated Reports**.
2. In the *All generated reports* section, locate and click the report name. The *File Download* message box appears.
3. Click **Open** to view the report.
4. In your PDF viewer, click **Print**.

# Chapter 3: Generating Reports on the My IT Environment Tab

This chapter describes the reports you can generate and access from the My IT Environment tab.

## Generate a New Report

The first time you access your reports, there are no generated reports. You must first define report parameters before you generate a report. Define the report type, format, and if you want to save the report as a report template for future use.

**Note:** When you generate a new report, you can select a maximum of 1400 devices, contracts, or Care Packs.

A list of report types display in the *Create a new report* section on the *New Report* tab.

The available report types are:

| Report                                    | Description                                                                                                                                                                                                                                            |
|-------------------------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>My Care Pack Report</b>                | The My Care Pack Report contains information about Care Pack support contracts. For more information about the report types, see <a href="#">"Generate the My Care Pack Report " on the next page.</a>                                                 |
| <b>My Contract Report</b>                 | The My Contract Report contains device information associated with the specified Service Agreement ID. For more information about the report types, see <a href="#">"Generate the My Contract Report" on page 20.</a>                                  |
| <b>My Contracts and Warranties Report</b> | The My Contracts and Warranties Report contains contract, Care Pack, and warranty information on the selected devices. For more information about the report types, see <a href="#">"Generate the My Contracts and Warranties Report" on page 22.</a>  |
| <b>My Device Configuration Report</b>     | The My Device Configuration Report contains detailed device configuration information for your remotely supported products. For more information about the report types, see <a href="#">"Generate the My Device Configuration Report" on page 23.</a> |

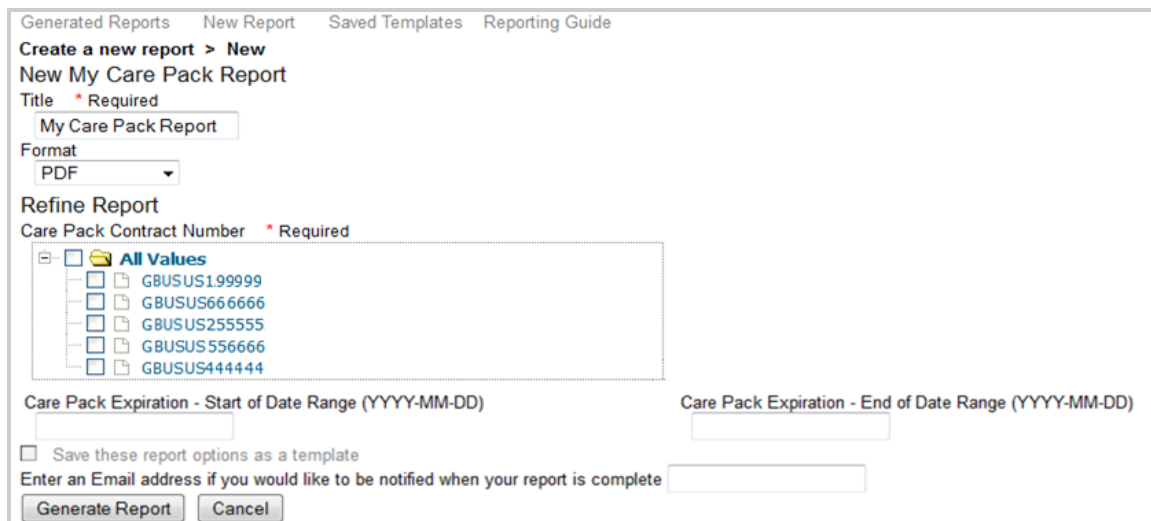

| Report                         | Description                                                                                                                                                                                                             |
|--------------------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>My Firmware Report</b>      | The My Firmware Report contains information about the installed firmware for the selected devices. For more information about the report types, see <a href="#">"Generate the My Firmware Report" on page 27.</a>       |
| <b>My Service Event Report</b> | The My Service Event Report contains information about the service events for the selected devices. For more information about the report types, see <a href="#">"Generate the My Service Event Report" on page 31.</a> |
| <b>My Support Case Report</b>  | The My Support Case Report contains information about support cases for the selected devices. For more information about the report types, see <a href="#">"Generate the My Support Case Report" on page 33.</a>        |

## Generate the My Care Pack Report

The My Care Pack Report contains information about Care Pack support contracts.

Before generating the My Care Pack Report, complete the following steps:

1. From the *New Report* tab, select the My Care Pack Report. The progress icon  appears while the report is opening. The My Care Pack Report template appears.

Generated Reports   New Report   Saved Templates   Reporting Guide

Care Pack Expiration - Start of Date Range (YYYY-MM-DD)

Care Pack Expiration - End of Date Range (YYYY-MM-DD)

☐ Save these report options as a template

Enter an Email address if you would like to be notified when your report is complete

2. In the Title field, type the report title.

**Note:** If you do not enter a report title, an error message appears when you click **Generate Report**.

3. From the **Format** drop-down list, select PDF, Microsoft Excel, or zipped CSV format.
4. Select one or more Care Pack Contract Number(s). Expand the All Values folder and select the Care Pack Contract Number check box.
5. Select the start and end date of the reporting period. The start and end date must be in the format YYYY-MM-DD.

**Note:** If the start date is after the end date, then an error appears. You must enter a start date before the end date of the reporting period.

6. Optional: Select the **Save these report options as a template** check box. The report template saves and is available for reuse from the *Saved Templates* tab.
7. Type a valid email address to receive an email notification when the report is complete.
8. Click **Generate Report**.

The My Care Pack Report appears in the *All generated reports* section on the *Generated Reports* tab. While the report is generating, the status of the report appears as *In Progress*. On average, reports generate once every 30 minutes. When the report generates, the status appears as *Completed*. You can download the report once the report has a status of *Completed*. If you entered an email address to receive a notification when the report completes, click the link in the email notification to view the report.

9. To download the generated report, click the report name and then click **Open** to view the report. The My Care Pack Report appears in PDF format.

| HP Care Pack Information   |                |                 |
|----------------------------|----------------|-----------------|
| HP Care Pack Serial Number | Support Status | Expiration Date |
| GBUBUS6E6666               | Active         | 2013-11-17      |
| GSUSUS444444               | Active         | 2013-12-10      |
| GBUSUS255555               | Active         | 2013-12-10      |

**Note:** The report may appear blank if there is no data available in the selected reporting period.

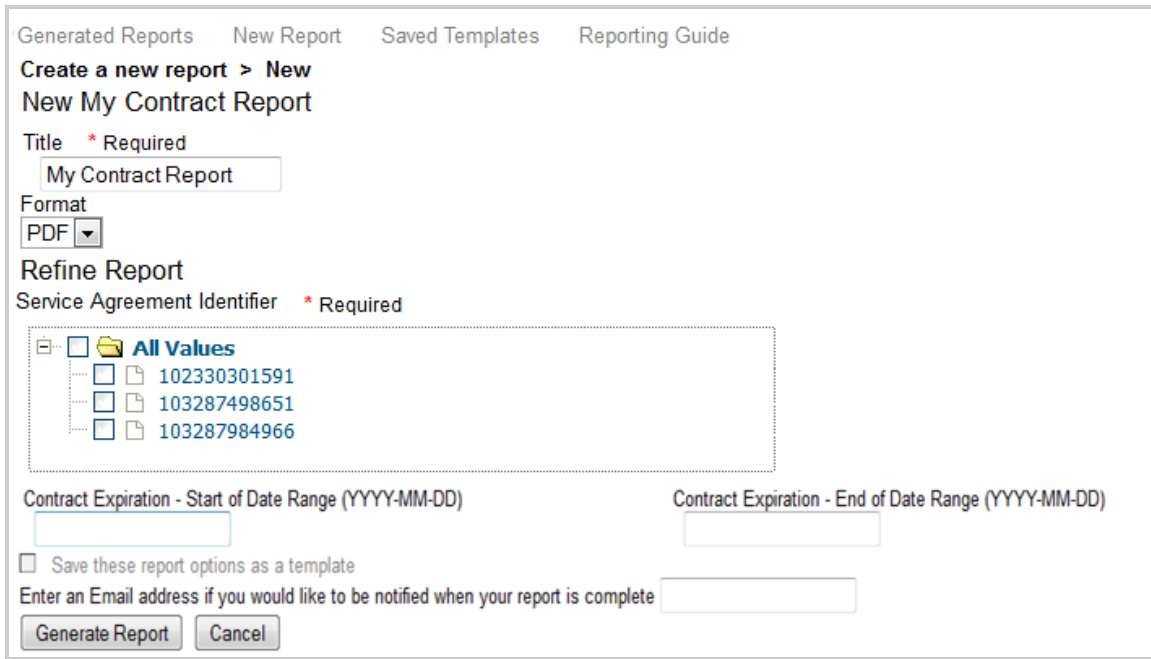

The My Care Pack Report contains the following columns:

| Column                            | Description                                                                                                          |
|-----------------------------------|----------------------------------------------------------------------------------------------------------------------|
| <b>HP Care Pack Serial Number</b> | The Care Pack product serial number that identifies the device.                                                      |
| <b>Support Status</b>             | The support status associated with the device during the specified reporting period, for example, Active or Expired. |
| <b>Expiration Date</b>            | The expiration date of the Care Pack contract.                                                                       |

# Generate the My Contract Report

The My Contract Report contains the status of the Service Agreements linked to your HP Passport ID. Before generating the My Contract Report, complete the following steps:

1. From the *New Report* tab, select the My Contract Report. The progress icon  appears while the report is opening. The My Contract Report appears.

2. In the Title field, type the report title.

**Note:** If you do not enter a report title, an error message appears when you click **Generate Report**.

3. From the **Format** drop-down list, select PDF, Microsoft Excel, or zipped CSV format.
4. Select one or more Service Agreement Identifier(s). Expand the All Values folder and select the Service Agreement Identifier check box.
5. Select the start and end date of the reporting period. The start and end date must be in the format YYYY-MM-DD.

**Note:** If the start date is after the end date, then an error appears. You must enter a start date before the end date of the reporting period.

6. Optional: Select the **Save these report options as a template** check box. The report template saves and is available for reuse from the *Saved Templates* tab.
7. Type a valid email address to receive an email notification when the report is complete.
8. Click **Generate Report**.

The My Contract Report appears in the *All generated reports* section on the *Generated Reports* tab. While the report is generating, the status of the report appears as *In Progress*. On average, reports generate once every 30 minutes. When the report generates, the status appears as *Completed*. You can download the report once the report has a status of *Completed*. If you entered an email address to receive a notification when the report completes, click the link in the email notification to view the report.

- To download the generated report, click the report name and then click **Open** to view the report. The My Contract Report appears in PDF format.

| HP Contract Information |        |                 |
|-------------------------|--------|-----------------|
| Service Agreement ID    | Status | Expiration Date |
| 531099930015            | Active | 2014-08-21      |
| 058625262226            | Active | 2014-08-21      |
| 252626101156            | Active | 2014-08-21      |
| 101027017645            | Active | 2014-08-21      |

**Note:** The report may appear blank if there is no data available in the selected reporting period.

The My Contract Report contains the following columns:

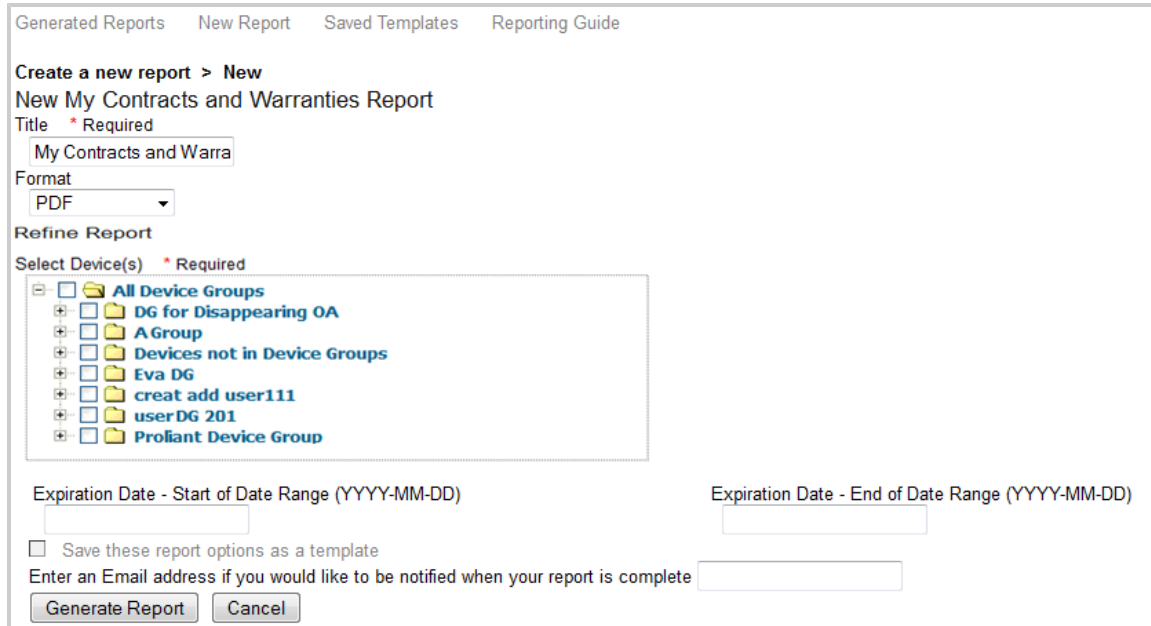

| Column                      | Description                                                                                                        |
|-----------------------------|--------------------------------------------------------------------------------------------------------------------|
| <b>Service Agreement ID</b> | The service agreement number linked to your HP Passport ID.                                                        |
| <b>Status</b>               | The support status of the service agreement during the specified reporting period, for example, Active or Expired. |
| <b>Expiration Date</b>      | The expiration date of the service agreement linked to your HP Passport ID.                                        |

# Generate the My Contracts and Warranties Report

The My Contracts and Warranties Report contains contract, Care Pack, and warranty information on the selected devices.

Before generating the My Contracts and Warranties Report, complete the following steps:

1. From the *New Report* tab, select the My Contracts and Warranties Report. The progress icon  appears while the report is opening. The My Contracts and Warranties Report appears.

2. In the Title field, type the report title.

**Note:** If you do not enter a report title, an error message appears when you click **Generate Report**.

3. From the **Format** drop-down list, select PDF, Microsoft Excel, or zipped CSV format.
4. Select one or more device(s) from the list. Expand the All Device Groups folder and select the Device check box.

**Note:** Virtual VM host devices are not available for selection as these devices do not have applicable contract and warranty data.

5. Select the start and end date of the reporting period. The start and end date must be in the format YYYY-MM-DD.

**Note:** If the start date is after the end date, then an error appears. You must enter a start date before the end date of the reporting period.

6. Optional: Select the **Save these report options as a template** check box. The report template saves and is available for reuse from the *Saved Templates* tab.

7. Type a valid email address to receive an email notification when the report is complete.
8. Click **Generate Report**.

The My Contracts and Warranties Report appears in the *All generated reports* section on the *Generated Reports* tab. While the report is generating, the status of the report appears as *In Progress*. On average, reports generate once every 30 minutes. When the report generates, the status appears as *Completed*. If you entered an email address to receive a notification when the report completes, click the link in the email notification to view the report.

9. To download the generated report, click the report name and then click **Open** to view the report. The following is an example of the Contract Report in PDF format.

**Note:** The report may appear blank if there is no data available in the selected reporting period.

| Contract            |                             |                                  |                      |                |                 |
|---------------------|-----------------------------|----------------------------------|----------------------|----------------|-----------------|

| ProLiant BL460 Gen8 | ProLiant BL460Gen8          | 557835-LLFL                      | 410329723            | Active         | 2013-12-10      |
| americas.qcorp      | BladeSystem c7000 Enclosure | REQUETLLFL                       | 610329767            | Active         | 2013-12-10      |

The My Contract and Warranties Report contains the following columns:

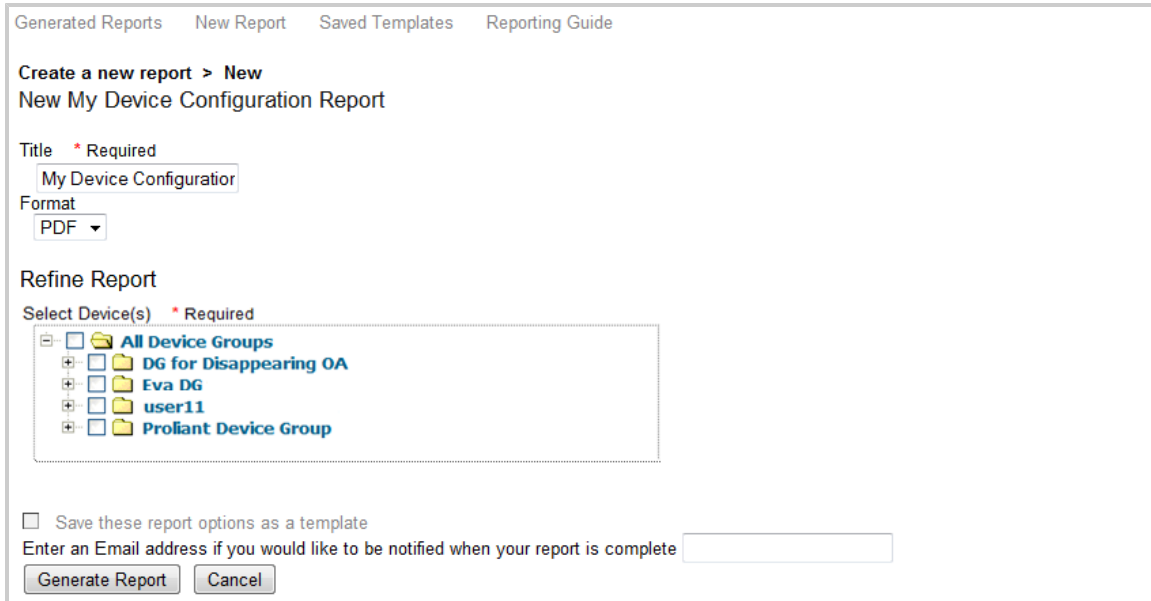

| Column                                  | Description                                                                                                                  |
|-----------------------------------------|------------------------------------------------------------------------------------------------------------------------------|
| <b>Device Name</b>                      | The name of the device.                                                                                                      |
| <b>Device Type</b>                      | The model name that identifies the type of device.                                                                           |
| <b>Support Account Reference Number</b> | The support account reference number associated with the device.                                                             |
| <b>Service Agreement ID</b>             | The service agreement identification number that identifies the device.                                                      |
| <b>Support Status</b>                   | The current support status associated with the device during the specified reporting period, for example, active or expired. |
| <b>Expiration Date</b>                  | The contract expiration date.                                                                                                |
| <b>Care Pack Product Serial Number</b>  | The Care Pack serial number associated with the device (Care Pack Report).                                                   |
| <b>Serial Number</b>                    | The device serial number (Warranty Report).                                                                                  |
| <b>Product Number</b>                   | The product number (Warranty Report).                                                                                        |

## Generate the My Device Configuration Report

The My Device Configuration Report contains information for HP EVA, ProLiant, BladeSystem c-Class Enclosure, StoreVirtual, HP P2000 Modular Smart Arrays (MSA), StoreFabric, StoreEasy, and StoreAll product families. You can generate a report on the selected product families or generate a report in any device combination of your choice.

Before generating the My Device Configuration Report, complete the following steps:

1. From the **New Report** tab, select the My Device Configuration Report. The progress icon  appears while the report is opening. The My Device Configuration Report appears.

2. In the Title field, type the report title.

**Note:** If you do not enter a report title, an error message appears when you click **Generate Report**.

3. From the **Format** drop-down list, select PDF.

**Note:** The Device Configuration Report is not available in zipped CSV format.

4. Select one or more device(s) from the list. Expand the All Device Groups folder and select the Device check box.

**Note:** Virtual VM host devices are not available for selection as these devices do not have applicable configuration data.

5. Optional: Select the **Save these report options as a template** check box. The report template saves and is available for reuse from the *Saved Templates* tab.
6. Enter a valid email address to receive an email notification when the report is complete.
7. Click **Generate Report**.

The My Device Configuration Report appears in the *All generated reports* section on the *Generated Reports* tab. While the report is generating, the status of the report appears as *In Progress*. On average, reports generate once every 30 minutes. When the report generates, the status appears as *Completed*. You can download the report once the report has a status of *Completed*. If you entered an email address to receive a notification when the report completes, click the link in the email notification to view the report.

8. To download the generated report, click the report name and then click **Open** to view the report. The generated My Device Configuration Report contains a summary page, graphs, and a detailed information page. The My Device Configuration Report appears in PDF format.

| Model Name                  | Count    |
|-----------------------------|----------|
| ENCLOSURE                   | 2        |
| BladeSystem c7000 Enclosure | 2        |
| EVA                         | 2        |
| EVA                         | 2        |
| PROLIANT                    | 3        |
| ProLiant BL455 Gen8         | 1        |
| ProLiant DL300 Gen8         | 1        |
| ProLiant SL255 Gen8         | 1        |
| <b>Total Systems</b>        | <b>7</b> |

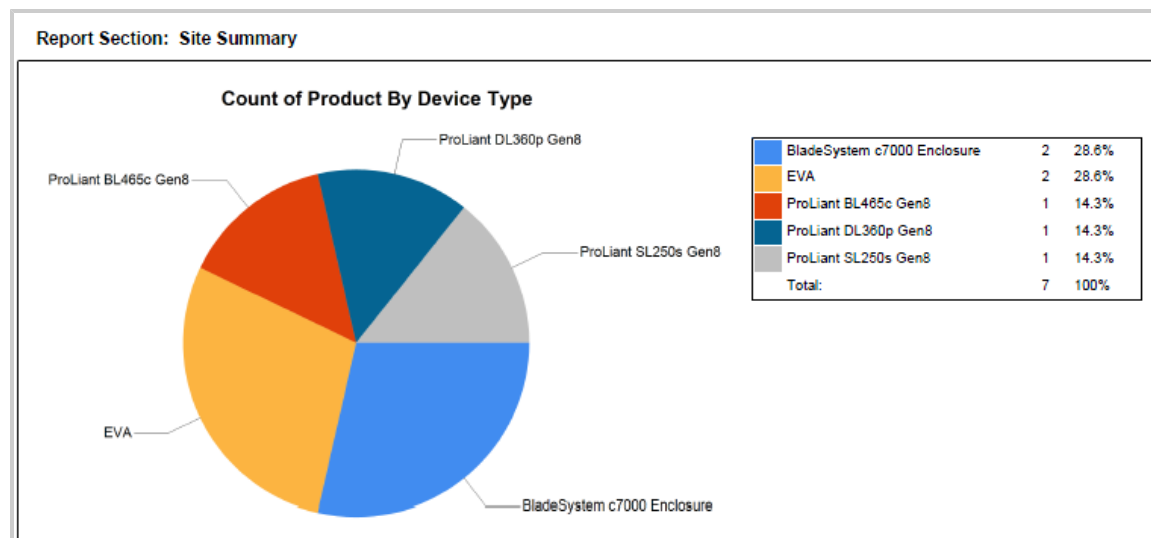

**Note:** If no configuration data returns for a selected device, then a configuration collection has not been received in the last six months.

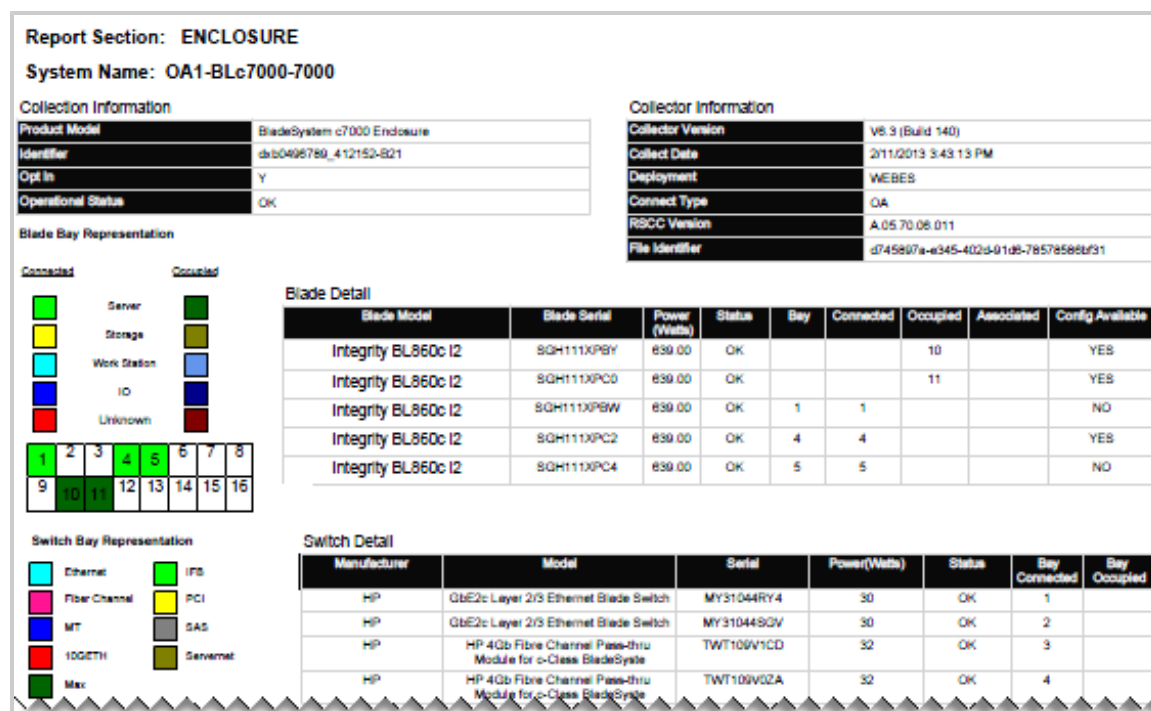

The My Device Configuration Report contains the following columns:

| Column            | Description                            |
|-------------------|----------------------------------------|
| <b>Model Name</b> | The model name of the reported server. |
| <b>Count</b>      | The number of reported servers.        |

Scroll down through the document to view a graphical representation of the My Device Configuration Report.

# Generate the My Firmware Report

The My Firmware Report contains information about the installed firmware for the selected devices.

Before generating the My Firmware Report, complete the following steps:

1. From the *New Report* tab, select the My Firmware Report. The progress icon  appears while the report is opening. The My Firmware Report appears.

2. In the Title field, type the report title.

**Note:** If you do not enter a report title, an error message appears when you click **Generate Report**.

3. From the **Format** drop-down list, select XLSX format (Microsoft Excel).
4. Select one or more device(s) from the list. Expand the All Device Groups folder and select the Device check box.

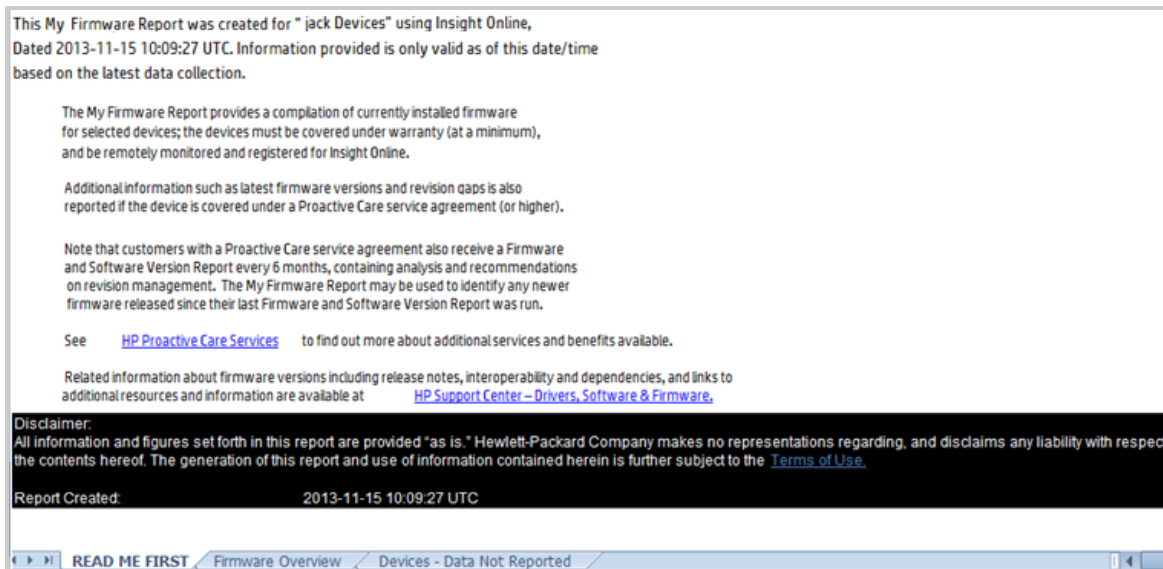

**Note:** Virtual VM host devices are not available for selection as these devices do not have applicable firmware data.

5. Optional: Select the **Save these report options as a template** check box. The report template saves and is available for reuse from the *Saved Templates* tab.
6. Type a valid email address to receive an email notification when the report is complete.
7. Click **Generate Report**.

The My Firmware Report displays in the *All generated reports* section on the *Generated Reports* tab. While the report is generating, the status of the report appears as *In Progress*. On average, reports generate once every 30 minutes. When the report generates, the status appears as *Completed*. You can download the report once the

report has a status of **Completed**. If you entered an email address to receive a notification when the report completes, click the link in the email notification to view the report.

8. To download the generated report, click the report name and then click **Open** to view the report. The My Firmware Report appears in Microsoft Excel format.

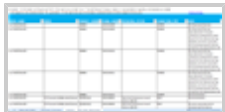

The generated My Firmware Report contains the following tabs:

| Tab                               | Description                                                                                                                                                                                       |

New My Service Event Report

Title \* Required  
My Service Event Report

Format  
PDF

Refine Report

Select Device(s) \* Required

- ☐ All Device Groups
  - ☐ DG for OA
  - ☐ Test Group
  - ☐ Devices not in Device Groups
  - ☐ Eva DG
  - ☐ creat add
  - ☐ user201
  - ☐ Proliant Device Group

Event Status \* Required  
Active  
Closed

Service Event Occurred - Start of Date Range (YYYY-MM-DD)

Service Event Occurred - End of Date Range (YYYY-MM-DD)

Problem Area Text

☐ Save these report options as a template

Enter an Email address if you would like to be notified when your report is complete

2. In the Title field, type the report title.

**Note:** If you do not enter a report title, an error message appears when you click **Generate Report**.

3. From the **Format** drop-down list, select PDF, Microsoft Excel, or zipped CSV format.
4. Select one or more device(s) from the list. Expand the All Device Groups folder and select the Device check box.

**Note:** Virtual VM host devices are not available for selection as these devices do not have applicable service event data.

5. Select the status of the event, Active, Closed, or both Active and Closed.

**Note:** This is a required field.

6. Select the start and end date of the reporting period. The start and end date must be in the format YYYY-MM-DD.

**Note:** If the start date is after the end date, then an error appears. You must enter a start date before

the end date of the reporting period.

7. In the Problem Area Text field, enter a description of the problem.
8. Optional: Select the **Save these report options as a template** check box. The report template saves and is available for reuse from the *Saved Templates* tab.
9. Type a valid email address to receive an email notification when the report is complete.
10. Click **Generate Report**.

The My Service Event Report displays in the *All generated reports* section on the *Generated Reports* tab. While the report is generating, the status of the report appears as *In Progress*. On average, reports generate once every 30 minutes. When the report generates, the status appears as *Completed*. You can download the report once the report has a status of *Completed*. If you entered an email address to receive a notification when the report completes, click the link in the email notification to view the report.

11. To download the generated report, click the report name and then click **Open** to view the report. The My Service Event Report appears in PDF format.

**Note:** A blank report appears when there is no data available for the selected date range.

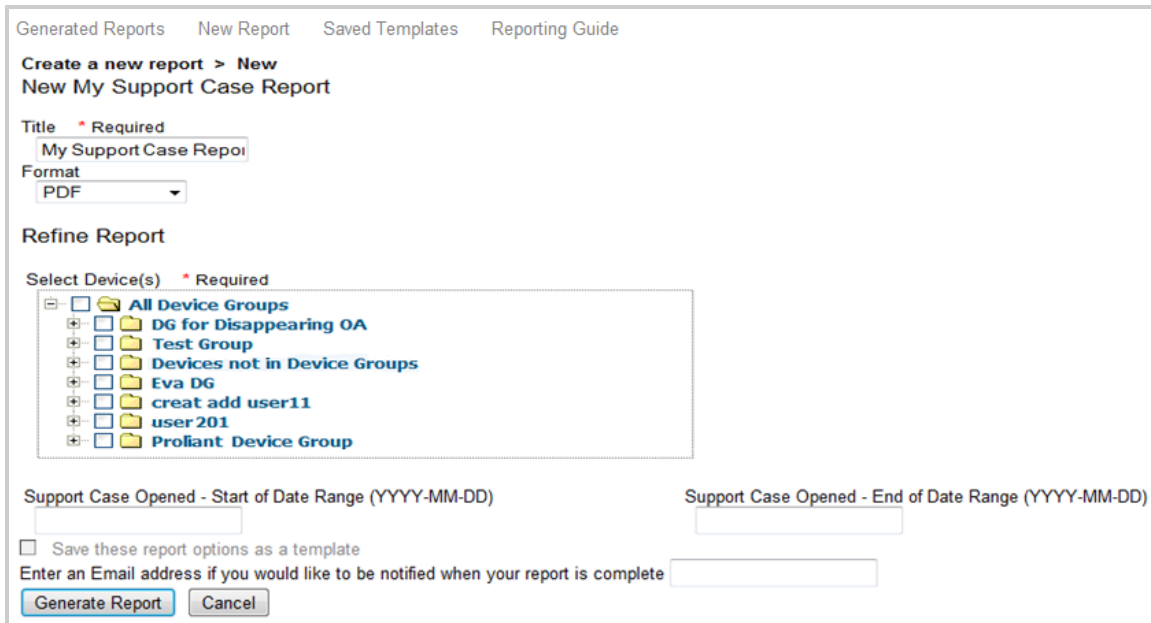

The generated My Service Event Report contains the following columns:

| Column                     | Description                                           |
|----------------------------|-------------------------------------------------------|
| <b>Device Name</b>         | The name of the device.                               |
| <b>Model</b>               | The model name that identifies the type of device.    |
| <b>Serial Number</b>       | The device serial number.                             |
| <b>Product Number</b>      | The product number.                                   |
| <b>Event GUID</b>          | The event identification number.                      |
| <b>Problem Description</b> | The description of the problem.                       |
| <b>Problem Area</b>        | The description of the problem area.                  |
| <b>Case ID</b>             | The case identification number.                       |
| <b>Status</b>              | The status of the event, for example, open or closed. |
| <b>Date Submitted</b>      | The date and time you submit the event.               |
| <b>Last Updated</b>        | The date and time the system updates the event.       |

# Generate the My Support Case Report

The My Support Case Report contains information about support cases for the selected devices. Before generating the My Support Case Report, complete the following steps:

1. From the **New Report** tab, select the My Support Case Report. The progress icon  appears while the report is opening. The Support Case Report appears.

2. In the Title field, type the report title.

**Note:** If you do not enter a report title, an error message appears when you click **Generate Report**.

3. From the **Format** drop-down list, select PDF, Microsoft Excel, or zipped CSV format.
4. Select one or more device(s) name from the list. Expand the All Device Groups folder and select the Device check box.

**Note:** Virtual VM host devices are not available for selection as these devices do not have applicable support case data.

5. Select the start and end date of the reporting period. The start and end date must be in the format YYYY-MM-DD.

**Note:** If the start date is after the end date, then an error appears. You must enter a start date before the end date of the reporting period.

6. Optional: Select the **Save these report options as a template** check box. The report template saves and is available for reuse from the *Saved Templates* tab.

7. Enter a valid email address to receive an email notification when the report is complete.
8. Click **Generate Report**.

The My Support Case Report appears in the *All generated reports* section on the *Generated Reports* tab. While the report is generating, the status of the report appears as *In Progress*. On average, reports generate once every 30 minutes. When the report generates, the status appears as *Completed*. You can download the report once the report has a status of *Completed*. If you entered an email address to receive a notification when the report completes, then click the link in the email notification to view the report.

9. To download the generated report, click the report name and then click **Open** to view the report. The My Support Case Report appears in PDF format.

Note: Support Cases closed over 30 days ago are not displayed in this report

The generated My Support Case Report contains the following columns:

| Column                | Description                                                  |
|-----------------------|--------------------------------------------------------------|
| <b>Device Name</b>    | The name of the device.                                      |
| <b>Model</b>          | The model name that identifies the type of device.           |
| <b>Serial Number</b>  | The device serial number.                                    |
| <b>Product Number</b> | The product number.                                          |
| <b>Case ID</b>        | The case identification number.                              |
| <b>Case Title</b>     | The title of the case.                                       |
| <b>Status</b>         | The status of the support case, for example, open or closed. |
| <b>Date Submitted</b> | The date and time you submit the support case.               |
| <b>Last Updated</b>   | The date and time the system updates the support case.       |

# Chapter 4: Generating Reports on the My Customers Tab

This chapter describes the customer reports you can access as a channel partner from the *Insight Online My Customers* tab. The following table lists the channel partner types and the customer reports each channel partner can generate on the *My Customers* tab:

| Channel Partner Type               | Report Type                                 |
|------------------------------------|---------------------------------------------|
| HP Authorized Service Partner      | My Customer Contracts and Warranties Report |
|                                    | My Customer Device Configuration Report     |
|                                    | My Customer Firmware Report                 |
|                                    | My Customer Service Event Report            |
|                                    | My Customer Support Case Report             |
| HP Authorized Reseller/Distributor | My Customer Contracts and Warranties Report |
|                                    | My Customer Device Configuration Report     |

**Note:** Only devices associated with the Sales and Service Partner ID appear in the report.

## Generate Customer Reports

Before you generate customer reports, there are some simple steps that the customer needs to take to enable your view as a channel partner:

As an HP Authorized Channel Partner, the option to run a report to display configuration of customer devices appears once the following steps are completed:

- Your customers' devices must be connected to HP for remote support using one of HP's remote support technologies. These include Insight Remote Support 7.X or Insight Online Direct Connect.

### **For devices connected through Insight Remote Support:**

During or after installation of Insight Remote Support, using the Insight Remote Support Hosting Device Set-Up Wizard, your customer must:

- Register with HP Support Center to manage their IT environment through HP Insight Online. To do this, the customer enters their HP Passport ID and Password.
- Associate their devices with their Partner Location ID as an HP Authorized Reseller or HP Authorized Service Partner. To do this, the customer enters your Location ID.
- Opt-in to share information and allow HP or HP Authorized Channel Partners to contact them to discuss optimizing their IT environment. To do this, the customer selects the Opt-in check box.

**For devices connected through Direct Connect:**

When registering Direct Connect Devices in Insight Online, your customer must:

- Associate their devices with your Partner Location ID as an HP Authorized Reseller or HP Authorized Service Partner. To do this, the customer enters your Location ID.
- Opt-in to share information and allow HP or HP Authorized Channel Partners to contact them to discuss optimizing their IT environment. To do this, the customer selects the Opt-in check box.

**Note:** Customer opt-in only applies to sharing configuration data in the My Customer Device Configuration Report. If the customer does not opt-in, then those devices will not appear in the My Customer Device Configuration Report. Other reports do not require opt-in.

**Note:** When you generate a new report, you can select a maximum of 1400 devices, contracts or Care Packs.

The available customer report types are:

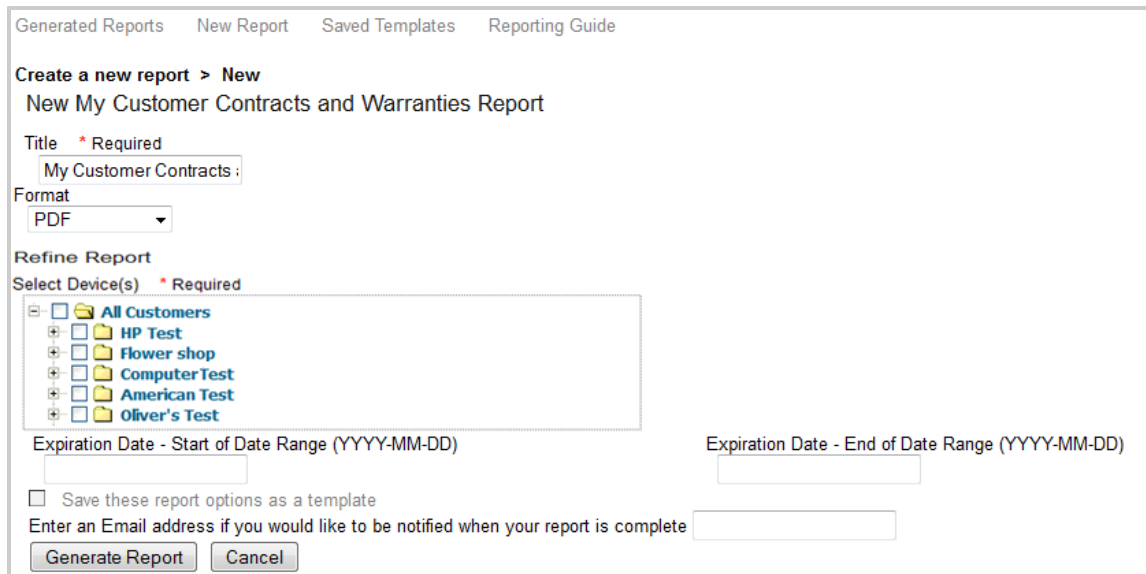

| Customer Report                                    | Description                                                                                                                                                                                                                                                             |
|----------------------------------------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>My Customer Contracts and Warranties Report</b> | The My Customer Contracts and Warranties Report contains contract, Care Pack, and warranty information. For more information about the report type, see <a href="#">"Generate the My Customer Contracts and Warranties Report" on the next page.</a>                    |
| <b>My Customer Device Configuration Report</b>     | The My Customer Device Configuration Report contains detailed device configuration information for your remotely supported products. # Generate the My Customer Contracts and Warranties Report

The My Customer Contracts and Warranties Report contains contract, Care Pack, and warranty information on the selected devices.

Before generating the My Customer Contracts and Warranties Report, complete the following steps:

1. From the **New Report** tab, select the My Customer Contracts and Warranties Report. The progress icon  appears while the report is opening. The My Customer Contracts and Warranties Report appears.

2. In the Title field, type the report title.

**Note:** If you do not enter a report title, an error message appears when you click **Generate Report**.

3. From the **Format** drop-down list, select PDF, Microsoft Excel, or zipped CSV format.
4. Select one or more device(s) from the list. Expand the All Customers folder and select the Device check box.

**Note:** Virtual VM host devices are not available for selection as these devices do not have applicable contract and warranty data.

5. Select the start and end date of the reporting period. The start and end date must be in the format YYYY-MM-DD.

**Note:** If the start date is after the end date, then an error appears. You must enter a start date before the end date of the reporting period.

6. Optional: Select the **Save these report options as a template** check box. The report template saves and is

available for reuse from the *Saved Templates* tab.

7. Type a valid email address to receive an email notification when the report is complete.
8. Click **Generate Report**.

The My Customer Contracts and Warranties Report appears in the *All generated reports* section on the *Generated Reports* tab. While the report is generating, the status of the report appears as *In Progress*. On average, reports generate once every 30 minutes. When the report generates, the status appears as *Completed*. If you entered an email address to receive a notification when the report completes, click the link in the email notification to view the report.

9. To download the generated report, click the report name and then click **Open** to view the report. The My Customer Contracts and Warranties Report contains a Contract, Care Pack, and Warranty report.

**Note:** The report may appear blank if there is no data available in the selected reporting period.

The My Customer Contract and Warranties Report contains the following columns:

| Column                                 | Description                                                                                                                  |
|----------------------------------------|------------------------------------------------------------------------------------------------------------------------------|
| <b>Device Name</b>                     | The name of the device.                                                                                                      |
| <b>Device Type</b>                     | The model name that identifies the type of device.                                                                           |
| <b>Support Status</b>                  | The current support status associated with the device during the specified reporting period, for example, active or expired. |
| <b>Expiration Date</b>                 | The contract expiration date.                                                                                                |
| <b>Care Pack Product Serial Number</b> | The Care Pack Product Serial number (Care Pack Report).                                                                      |
| <b>Serial Number</b>                   | The serial number (Warranty Report).                                                                                         |
| <b>Product Number</b>                  | The product number (Warranty Report).                                                                                        |

## Generate the My Customer Device Configuration Report

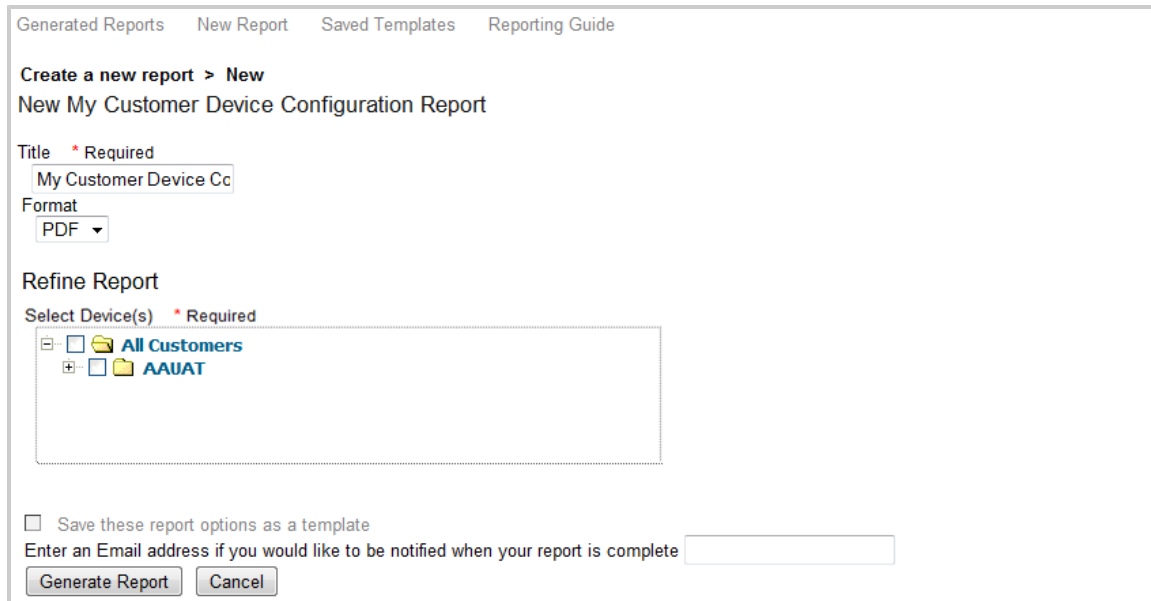

The My Customer Device Configuration Report contains information for HP EVA, ProLiant, BladeSystem c-Class Enclosure, StoreVirtual, HP P2000 Modular Smart Arrays (MSA), StoreFabric, StoreEasy, and StoreAll product families. You can generate a report on the selected product families or generate a report in any device combination of your choice.

**Note:** The report only displays if the customer selects opt-in. Customers have the option to filter devices that appear in the My Customer Device Configuration Report. Therefore, some devices may not appear in the report.

Before generating the My Customer Device Configuration Report, complete the following steps:

1. From the **New Report** tab, select the My Customer Device Configuration Report. The progress icon  appears while the report is opening. The My Customer Device Configuration Report appears.

2. In the Title field, type the report title.

**Note:** If you do not enter a report title, an error message appears when you click **Generate Report**.

3. From the **Format** drop-down list, select PDF.
4. Select one or more device(s) name from the list. Expand the All Customers folder and select the Device check box.

**Note:** Virtual VM host devices are not available for selection as these devices do not have applicable configuration data.

5. Optional: Select the **Save these report options as a template** check box. The report template saves and is available for reuse from the *Saved Templates* tab.
6. Type a valid email address to receive an email notification when the report is complete.
7. Click **Generate Report**.

The My Customer Device Configuration Report appears in the *All generated reports* section on the *Generated Reports* tab. While the report is generating, the status of the report appears as *In Progress*. On average, reports generate once every 30 minutes. When the report generates, the status appears as *Completed*. You can download the report once the report has a status of *Completed*. If you entered an email address to receive a notification when the report completes, click the link in the email notification to view the report.

8. To download the generated report, click the report name and then click **Open** to view the report. The generated My Customer Device Configuration Report contains a summary page, graphs, and a detailed information page. The My Customer Device Configuration Report appears in PDF format.

| Model Name                     | Count    |

# Generate the My Customer Firmware Report

The My Customer Firmware Report contains information about the firmware for the selected devices. Before generating the My Customer Firmware Report, complete the following steps:

1. From the **New Report** tab, select the My Customer Firmware Report. The progress icon  appears while the report is opening. The My Customer Firmware Report appears.

2. In the Title field, type the report title.

**Note:** If you do not enter a report title, an error message appears when you click **Generate Report**.

3. From the **Format** drop-down list, select XLSX (Microsoft Excel).
4. Select one or more device(s) from the list. Expand the All Customers folder and select the Device check box.

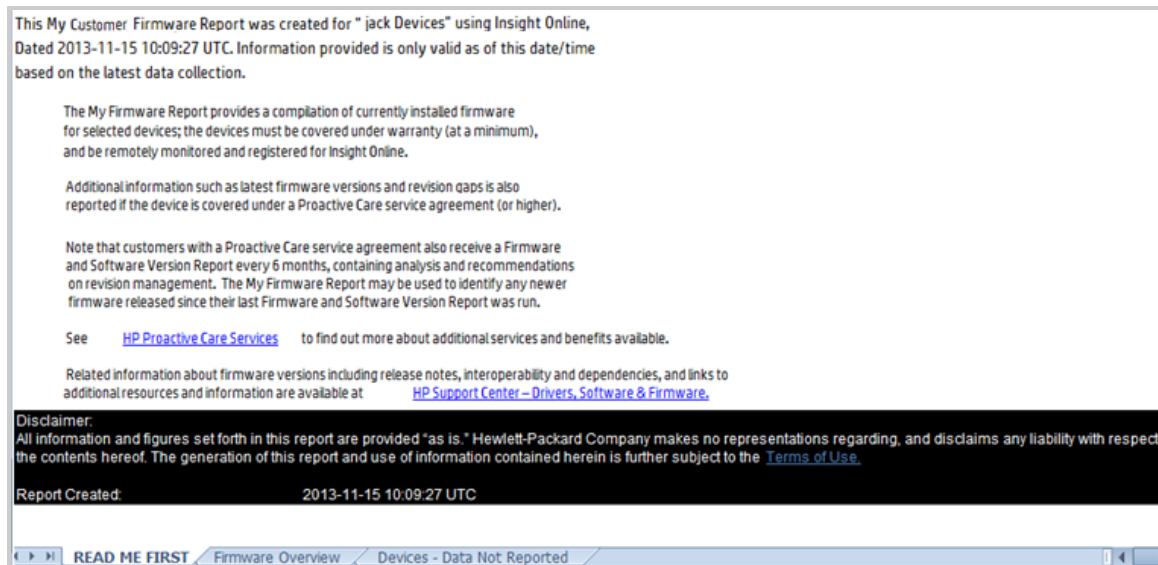

**Note:** Virtual VM host devices are not available for selection as these devices do not have applicable firmware data.

5. Optional: Select the **Save these report options as a template** check box. The report template saves and is available for reuse from the *Saved Templates* tab.
6. Type a valid email address to receive an email notification when the report is complete.
7. Click **Generate Report**.

The My Customer Firmware Report displays in the *All generated reports* section on the *Generated Reports* tab. While the report is generating, the status of the report appears as *In Progress*. On average, reports generate once every 30 minutes. When the report generates, the status appears as *Completed*. You can download the report

once the report has a status of *Completed*. If you entered an email address to receive a notification when the report completes, click the link in the email notification to view the report.

8. To download the generated report, click the report name and then click **Open** to view the report. The My Customer Firmware Report appears in Microsoft Excel format.

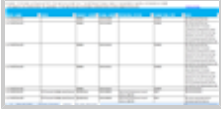

The My Customer Firmware Report contains the following tabs:

| Tab                               | Description                                                                                                                                                                                       |
|-----------------------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>Read Me First</b>              | Additional information about the report. See above example.                                                                                                                                       |
| <b>Firmware Overview</b>          | Contains information about the current firmware running on the selected devices. Click the column name to view and select other options.                                                          |
| <b>Devices- Data Not Reported</b> | Contains information about the devices with no available firmware and provides technical reasons why the report did not generate results. Click the column name to view and select other options. |

The generated My Customer Firmware Report contains the following columns:

| Tab                                                                                                    | Column                                              | Description                                                                                                                                                               |

# Generate the My Customer Service Event Report

The My Customer Service Event Report contains information about the service events for the selected devices.

Before generating the My Customer Service Event Report, complete the following steps:

1. From the *New Report* tab, select the My Customer Service Event Report. The progress icon  appears while the report is opening. The Customer Service Event Report appears.

2. In the Title field, type the report title.

**Note:** If you do not enter a report title, an error message appears when you click **Generate Report**.

3. From the **Format** drop-down list, select PDF, Microsoft Excel, or zipped CSV format.

**Note:** This is a required field.

4. Select one or more device(s) from the list. Expand the All Customers folder and select the Device check box.

**Note:** Virtual VM host devices are not available for selection as these devices do not have applicable service event data.

5. Select the status of the event, Active, Closed, or both Active and Closed.

**Note:** This is a required field.

6. Select the start and end date of the reporting period. The start and end date must be in the format YYYY-MM-DD.

**Note:** If the start date is after the end date, then an error appears. You must enter a start date before the end date of the reporting period.

7. In the Problem Area Text field, enter a description of the problem.
8. Optional: Select the **Save these report options as a template** check box. The report template saves and is available for reuse from the *Saved Templates* tab.
9. Type a valid email address to receive an email notification when the report is complete.
10. Click **Generate Report**.

The My Customer Service Event Report appears in the *All generated reports* section on the *Generated Reports* tab. While the report is generating, the status of the report appears as *In Progress*. On average, reports generate once every 30 minutes. When the report generates, the status appears as *Completed*. You can download the report once the report has a status of *Completed*. If you entered an email address to receive a notification when the report completes, click the link in the email notification to view the report.

11. To download the generated report, click the report name and then click **Open** to view the report. The My Customer Service Event Report appears in PDF format.

**Note:** A blank report appears when there is no data available for the selected date range.

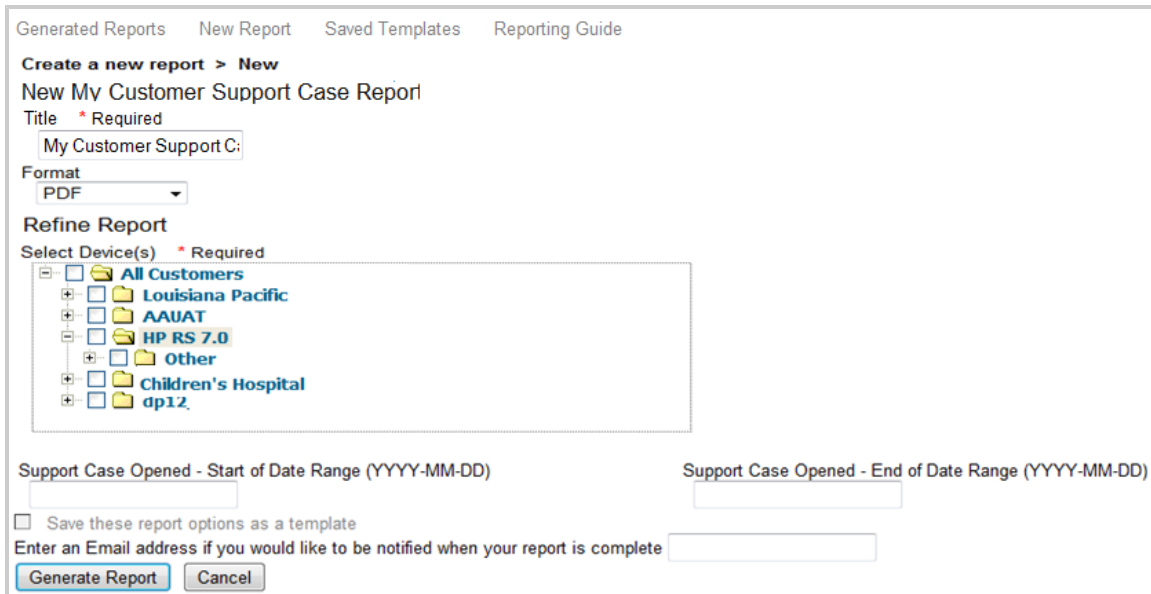

The generated My Customer Service Event Report contains the following columns:

| Column                     | Description                                        |
|----------------------------|----------------------------------------------------|
| <b>Device Name</b>         | The name of the device.                            |
| <b>Model</b>               | The model name that identifies the type of device. |
| <b>Serial Number</b>       | The device serial number.                          |
| <b>Product Number</b>      | The product number.                                |
| <b>Event GUID</b>          | The event identification number.                   |
| <b>Problem Description</b> | The description of the problem.                    |
| <b>Problem Area</b>        | The description of the problem area.               |
| <b>Case ID</b>             | The case identification number.                    |
| <b>Status</b>              | The status of the service event.                   |
| <b>Date Submitted</b>      | The date and time you submit the event.            |
| <b>Last Updated</b>        | The date and time the system updates the event.    |

## Generate the My Customer Support Case Report

The My Customer Support Case Report contains information about support cases for the selected devices. Before generating the My Customer Support Case Report, complete the following steps:

1. From the *New Report* tab, select the My Customer Support Case Report. The progress icon  appears while the report is opening. The Customer Support Case Report appears.

Generated Reports   New Report   Saved Templates   Reporting Guide

Create a new report > New

New My Customer Support Case Report

Title \* Required

My Customer Support Case Report

Format

PDF

Refine Report

Select Device(s) \* Required

- ☐ All Customers
- ☐ Louisiana Pacific
- ☐ AAUAT
- ☐ HP RS 7.0
- ☐ Other
- ☐ Children's Hospital
- ☐ dp12

Support Case Opened - Start of Date Range (YYYY-MM-DD)

Support Case Opened - End of Date Range (YYYY-MM-DD)

☐ Save these report options as a template

Enter an Email address if you would like to be notified when your report is complete

Generate Report   Cancel

2. In the Title field, type the report title.

**Note:** If you do not enter a report title, an error message appears when you click **Generate Report**.

3. From the **Format** drop down list, select PDF, Microsoft Excel, or zipped CSV format.
4. Select one or more device(s) from the list. Expand the All Customers folder and select the Device check box.

**Note:** Virtual VM host devices are not available for selection as these devices do not have applicable support case data.

5. Select the start and end date of the reporting period. The start and end date must be in the format YYYY-MM-DD.

**Note:** If the start date is after the end date, then an error appears. You must enter a start date before the end date of the reporting period.

**Note:** Support cases closed over 30 days ago do not display in the report.

6. Select the **Save these report options as a template** check box to save the template.
7. Type a valid email address to receive an email notification when the report is complete.
8. Optional: Select the **Save these report options as a template** check box. The report template saves and is available for reuse from the *Saved Templates* tab.
9. Click **Generate Report**.

The My Customer Support Case Report appears in the *All generated reports* section on the *Generated Reports* tab. While the report is generating, the status of the report appears as *In Progress*. On average, reports generate once every 30 minutes. When the report generates, the status appears as *Completed*. You can download the report once the report has a status of *Completed*. If you entered an email address to receive a notification when the report completes, click the link in the email notification to view the report.

10. To download the generated report, click the report name and then click **Open** to view the report. The My Customer Support Case Report appears in PDF format.

**Note:** Support Cases closed over 30 days ago are not displayed in this report

**Note:** A blank report appears when there is no data available for the selected date range or when a service event is closed more than 30 days ago.

The generated My Customer Support Case Report contains the following columns:

| Column                | Description                                            |
|-----------------------|--------------------------------------------------------|
| <b>Device Name</b>    | The name of the device.                                |
| <b>Model</b>          | The model name that identifies the type of device.     |
| <b>Serial Number</b>  | The device serial number.                              |
| <b>Product Number</b> | The product number.                                    |
| <b>Case ID</b>        | The case identification number.                        |
| <b>Case Title</b>     | The title of the case.                                 |
| <b>Status</b>         | The support status, for example, open or closed.       |
| <b>Date Submitted</b> | The date and time you submit the support case.         |
| <b>Last Updated</b>   | The date and time the system updates the support case. |

# Chapter 5: Troubleshooting Reports

This chapter provides information to help you identify and resolve issues you might encounter when generating reports.

## Understand Error Messages

The following table describes common error messages that display on the user interface:

| Error Message                                                                                     | Description                                                                                      |
|---------------------------------------------------------------------------------------------------|--------------------------------------------------------------------------------------------------|
| No data found                                                                                     | There is no data available.                                                                      |
| Select one or more items from the list                                                            | You did not enter a required field.                                                              |
| You have no reports available. Select New Report to create a report                               | You have no generated reports.                                                                   |
| You have no saved templates. Select a report and use the save option to create a template         | You have no saved templates.                                                                     |
| Report Title is required                                                                          | You did not enter a required report title.                                                       |
| No Devices selected or No Collection Information was returned for the selected devices            | There are no devices in the list.                                                                |
| The specified email address is invalid. Please try again. Valid address example: jdoe@example.com | You must enter a valid email address to receive an email notification when the report completes. |

## Understand Known Issues

The following lists known issues and workarounds:

| Issue                                                                                            | Description                                                                                                                                              | Workaround                                                                                                                                                                                                                                                                                                                                                                                        |
|--------------------------------------------------------------------------------------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Support of International Characters in the report name for opening and saving generated reports. | If you enter International Characters in the report name, the characters appear blank in the pop-up window when opening and saving the generated report. | Save the report to your local drive and rename the report.                                                                                                                                                                                                                                                                                                                                        |
| Retry link does not display.                                                                     | The Retry link does not display when a report has a status of Failed.                                                                                    | Complete one of the following: <ul style="list-style-type: none"><li>Return to the New Report tab and regenerate the report with the same selected parameters.</li><li>Return to the Saved Templates tab and regenerate the report from a saved template (when generating a report, you must select the Save these report options as a template check box to save the report template).</li></ul> |

# Glossary

## A

### **Authenticated User**

A user who has access to Reports.

## C

### **Comma-separated values (CSV)**

A comma-separated values (CSV) file stores tabular data (numbers and text) in plain-text form.

## H

### **HP Authorized Channel Partner**

HP Authorized Channel Partner delivers services and/or installation services on HP's behalf.

### **HP Insight Online**

HP Insight Online provides one-stop personalized, secure access to support the devices in your IT environment. It is integrated into HP Support Center for your IT staff who deploy, manage and support systems, plus HP Authorized Channel Partners who support your IT infrastructure.

### **HP Insight Remote Support**

HP Insight Remote Support provides proactive remote monitoring, diagnostics, and troubleshooting to help improve the availability of supported HP servers and storage systems in your data center.

### **HP Passport**

HP Passport is a single sign-in service that lets you register with HP Passport enabled Web sites using a single user identifier and password of your choice.

### **HP Passport Password**

The HP Passport password you need when signing in to HP Passport enabled Web sites.

### **HP Passport User ID**

The HP Passport User ID you need when signing in to HP Passport enabled Web sites.

### **HP Support Center(HPSC)**

HP support portal for business, enterprise, and IT users. It provides personalized, one-stop access to the information, tools and help you need to get support for the HP products you use.

## K

### **Known Issues**

Displays information and workarounds for known issues.

## M

### **My Care Pack Report**

Displays information about Care Pack support contracts.

### **My Contract Report**

Displays device information associated with the specified Service Agreement ID.

### **My Contracts and Warranties Report**

Displays contract, care pack, and warranty information on the selected devices.

### **My Device Configuration Report**

Displays information about the selected HP EVA, ProLiant, and BladeSystem Onboard Administrator.

### **My Firmware Report**

Displays information about the installed firmware for the selected devices.

### **My Service Event Report**

Displays information about the service events for the selected devices.

### **My Support Case Report**

Displays information about support cases for the selected devices.

## **MyTerm**

### **O**

#### **Opt-in**

Opt-in means the customer consents to have HP or a partner contact them to discuss optimizing their environment.

### **P**

#### **Proactive Insight experience**

Proactive Insight experience integrates an online, personalized dashboard (HP Insight Online), a support portal and mobile app (HP Support Center), and 24x7 remote support (HP Insight Remote Support) for the consolidated infrastructure(servers, storage, network, and printing).

### **R**

#### **Report type**

The report template you select to generate.

#### **Reports**

The reporting feature available on Insight Online.
